

# Niem Dang

## Senior Director, Emerging Technologies, ONE Media 3.0, LLC

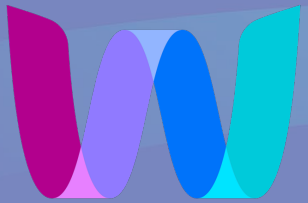

Since July 2021, Niem Dang began her new adventure with ONE Media 3.0, LLC as Senior Director for Emerging Technologies. She is responsible for the evolution and enablement of Advanced Emergency Information (AEI) service, content security and spectrum sharing services over NextGen Broadcast and NextGen TV. She is an active contributor at the ATSC Standards, representing both ONE Media 3.0, LLC and Sinclair Broadcast Group. She loves exploring and implementing innovative ways broadcasters can leverage ATSC3.0 signal and newsroom platform for timely delivery of emergency information to cars and companion devices.

Between 2005 and 2021, Niem worked for Charter, SCTE, CableLabs (through Visiting Engineer program), Time Warner Cable (now Charter) and Comcast. She still reflects fondly of her journey beginning with the cable industry, and the lasting friendship and professional network she built. She coached team, group and individuals by offering sessions on the patent process or innovation.

Niem holds over twenty patents, a certificate from the SCTE-Tuck Executive Leadership Program by Dartmouth, Innovation Bootcamp by CableLabs, three SAFe certifications, a BS degree in Computer Science at the University of Maryland in College Park, and a BS degree in Biochemistry at the University of New Hampshire in Durham.

Niem works every day to foster a creative and inclusive environment for her industry, team, peers and communities. She leads with these core values – Listen, Connect, Collaborate, Deliver. She wants to give back by serving as a catalyst to help lift up more women in technology.

Niem currently lives in Charm City, enjoys strolling along the Inner Harbor, explores new coffee shops and bakeries, and hopes to go crabbing for the first time soon.
