

Casey Bleeker is the CEO & Co-Founder of SurePath AI. SurePath AI is the leading SaaS platform for governing GenAI usage, offering comprehensive risk management, oversight, and control through a unified policy engine that integrates seamlessly with your existing network security solutions.

Previously, Casey was the VP & GM of Cloud & Cloud Native for CDW's Digital Velocity SI (System Integrator) practice, a \$2B+ business that managed the entire cloud lifecycle for clients, from consumption & cloud resale to professional consulting services & managed services.

Before joining CDW through the IGNW acquisition, Bleeker was the Director for Cloud Advocacy and Enablement at IGNW, leading strategic marketing, sales, and consulting efforts for IGNW's partner and vendor ecosystem. Prior, Bleeker served in senior roles at Cisco in M&A, business development, and solutions architecture for AI/ML, IoT, collaboration, and developer advocacy. Before that, he consulted for over a decade in the Microsoft, public sector, and VAR ecosystems.

Bleeker earned a bachelor's degree in computational biology from the University of Colorado and earned a certificate in Big Data & Social Analytics from MIT.
