MacKenzie Roebuck-Walsh Bio

MacKenzie Roebuck-Walsh is an AI and go-to-market leader, TEDx speaker, and visiting professor at DePaul University with more than 15 years of experience driving growth and transformation across technology, telecommunications, fintech, edtech, and travel.

Currently an Account Executive at Databricks, MacKenzie helps organizations turn data and AI into meaningful business results.

Known for making complex ideas practical and actionable, MacKenzie speaks about generative AI, growth strategy, digital transformation, leadership, and building teams with a bias for action. She holds an International MBA from the University of Denver. She chaired the Denver Women's Commission and has been recognized as a Woman to Watch and Rising Leader by WICT.

She is also a proud mother of three who loves getting outside with her kiddos and is proud of her weekly Thursday date night with her husband Tom Kurek.
